

SATORI Membership Suite — Project Scope & Starter Bundle Plan (v0.2)

Firm Baseline — Aug 2025

Executive Summary

The SATORI Membership Suite is a collection of modular WordPress plugins designed to work great individually and even better together.

Each plugin follows common UX, security, and coding standards. The suite will be distributed via ****wordpress.com.au**** (storefront,

licensing, updates) while cross-promoting services hosted on ****satori.com.au****.

See Appendix C for a visual overview of the distribution and revenue model.

1. Scope and Purpose

- Create a unified plugin suite with FREE and PRO bundles.
- Enterprise functionality (e.g., SSO, audit sinks) is deferred until the core suite is stable and generating revenue.
- Prioritize rapid delivery of FREE and PRO bundles to establish market presence and cash flow.

2. Product Lineup

****Base Modules (FREE/PRO):****

- SATORI Core
- SATORI Forms
- SATORI Events
- SATORI Members
- SATORI Payments
- SATORI Search
- SATORI Filters
- SATORI Notifications
- SATORI Reports

****Optional Future Modules:****

- SATORI Tables (interactive DataTables integration)
- SATORI Folders (media/file management)

3. Bundling Strategy

- ****FREE Bundle:**** lightweight starter modules (Forms, Events, Search, Filters).
- ****PRO Bundle:**** adds Members, Payments, Notifications, Reports, licensing & update services.
- ****Enterprise Bundle:**** deferred; will focus on SSO, advanced audit, org hierarchies.

Bundles will be available via ****wordpress.com.au**** with licensing and self-hosted updates.

4. Design and UX Standards

- Intuitive and responsive UX across both admin and frontend.
- Shared SATORI branding, color scheme, typography.
- Dynamic tabbed admin screens with consistent “Tools/Settings” panel.
- Drag-and-drop, sliders, toggles for configuration where possible.
- Shared documentation/help panels with AI-assisted troubleshooting (future option).

5. Security and Compliance

- Standard security practices: nonces, honeypots, sanitization, escaping.
- Encryption for sensitive data.
- Compliance with GDPR/CCPA for user data collection.
- Strict coding standards (WordPress CS, PSR-4, PHPCS, PHPStan).

6. Folder & Code Standards

- Common folder structure: ``core/``, ``modules/``, ``docs/``, ``assets/``, etc.
- Shared SCSS with consistent naming conventions.
- Boxed comment format (SATORI standard).
- All modules autoload via SATORI Core, no duplicate code.

7. Licensing & Updates

- All plugins include ``Update URI`` pointing to `**updates.wordpressed.com.au**`.
- Update server returns JSON with version, package URL, and changelog.
- Licensing enforced for PRO/Enterprise with key validation.
- Native WP update notifications triggered via ``pre_set_site_transient_update_plugins``.
- Rollback/delta updates on roadmap.

8. Integration Strategy

- Modules integrate seamlessly with each other through shared hooks.
- Example: Forms → Members, Events → Reports, Payments → Members.
- Optional modules (Tables, Folders) act as shared infrastructure for Reports, Media, etc.
- External integrations (Stripe, ACF, Pods) standardized.

Appendix A — Known Gaps / To Do Later

- Branding guidelines finalisation.
- DevOps automation (releases, hashes, CI/CD).

- Extended integrations (Google Drive, OneDrive).
- AI-assisted support/help widget.
- Full SATORI WP Theme.

Appendix B — Milestone Reminders

- **Phase 2 (Monetization & Memberships):** Prepare and export a downloadable PDF “Roadmap Pack” with timeline graphics, descriptions, and known gaps.

Appendix C — Distribution Architecture

Visual diagram showing the relationship between:

- **wordpress.com.au** → Storefront, Licensing, Update API
- **satori.com.au** → Services, consulting, upsells
- **Customer WP Sites** → Running SATORI Core + modules

See accompanying `satori\_distribution\_architecture.png` in `/assets`.
